GDPR Certification Lead Auditor and Consultant Training

CSA cloud security alliance®

Lead Auditor and Consultant Training on CSA Code of Conduct for GDPR Compliance

About the course

Join CSA's **Lead Auditor and Consultant Training on the CSA Code of Conduct (CoC) for GDPR Compliance course** which will train lead auditors and consultants in the CSA GDPR Code of Conduct and the CSA GDPR Certification. Both these initiatives offer organizations a means to demonstrate their compliance and data protection transparency with respect to the GDPR.

The course trains lead auditors and consultants on both the **CSA GDPR Code of Conduct Proposal as per Article 40 GDPR** and the forthcoming **CSA proposal for GDPR Certification as per Article 42 GDPR**. The CSA GDPR Code of Conduct as per Article 40 GDPR is currently progressing under the review of the CNIL and the CSA GDPR Certification as per Article 42 GDPR will be submitted to the CNIL for its review in the coming months.

Duration
Two (2) days:
Face-to-face
On-premise
or *In-company*

Four (4) half-days;
Webinar Edition

Cost
€2.000 per participant
excl. 21% VAT

WHO SHOULD TAKE THIS COURSE?

The CSA CoC for GDPR compliance training course is aimed to professionals wanting to learn how to guide organisations toward GDPR compliance or audit cloud providers based on the requirements of the CSA Code of Practice for GDPR compliance.

Individuals best suited to this course include:
• Auditors and consultants in IT security, privacy and cybersecurity
• Managers in emerging technology, risk and compliance
• Data Protection Officers (DPOs)
• In-house legal counsel, lawyers specializing in privacy, data protection and IT law

In addition, this training is a requirement for any professional who wants to become a:
• CSA GDPR Certification Lead Auditor
• CSA GDPR Code of Practice Consultant

The course is offered in various forms, including the possibility of in-company training courses. Choose the form that suits you best.

• **On-premise Training Courses**
• **Online Training Courses**
  (from 15 to 19 CEST for participants from Europe and the Americas)
• **In-company Training Courses**

On-premise Training Course

During day one, participants will learn the controls covered in the CSA Code of Conduct, starting with the fundamentals of GDPR and the objectives, scope and methodology of the CSA Code of Conduct (CoC). Participants will then go through each of the controls covered in the CoC:

• Controls 1-5: CSP declaration of compliance and accountability, CSP relevant contacts, ways in which data will be processed, recordkeeping and data transfer.

• Controls 6-10: data security, monitoring, personal data breach, data portability and migration, and restriction of processing.

• Controls 11-15: data retention, restitution and deletion, cooperation with the cloud customers, legally required disclosure, remedies for cloud customers and CSP insurance policy.

• Governance and Adherence Mechanisms

On day two, participants will work through the practical application of the controls with two different case studies. Afterwards, participants will review and receive feedback on the work performed in each of the case studies.

- Valuable insights due to interaction with participants from different fields
- Lunch & lavish coffee breaks included
- Discretionary evening program

Online Training Course

As the course is considerably demanding, it has been adapted for live interactive webinar sessions, consisting of four days of four-hour afternoon sessions including appropriate breaks. This allows participants from both Europe and the Americas to participate. Please contact us to learn more about the possibilities for a webinar for Asia and Australia.

During day one, participants will learn the controls covered in the CSA Code of Conduct, starting with the fundamentals of GDPR and the objectives, scope and methodology of the CSA Code of Conduct (CoC) and Governance and Adherence Mechanisms. Participants will then go through controls 1-5 covered in the CoC:

• CSP declaration of compliance and accountability, CSP relevant contacts, ways in which data will be processed, recordkeeping and data transfer.

On day two, participants will go through the remaining controls 6-15 covered in the CoC:

• Controls 6-10: data security, monitoring, personal data breach, data portability and migration, and restriction of processing.

• Controls 11-15: data retention, restitution and deletion, cooperation with the cloud customers, legally required disclosure, remedies for cloud customers and CSP insurance policy.

During the last two days, participants will work through the practical application of the controls with one case study per day. Afterwards, participants will review and receive feedback on the work performed in each of the case studies.

- Participate in the course from any location
- Save on time and travel arrangements
- Possibility to join with just 24-hour notice, capacity permitting

In-company Training Course

In order to meet the unique business needs of your organization, we offer the possibility to arrange In-company Training Courses for your employees and collaborators. For more information or to arrange an In-company Training Course, please contact us.

- The organizational set-up of the course will be tailored to your preferences
- Save on time and travel arrangements
- Select the most convenient dates for your organization
